

Pebble Geo – One Page Business Case

This document summarises the high-level business case for adoption of the Pebble Geo geotechnical and geo-environmental borehole logging software.

What is Pebble Geo?

Pebble Geo is designed as a cost-effective, low-risk, easy-to-use alternative to products like HoleBASE, gINT and OpenGround, and to other 'cloud-only' options on the market.

It can be used to log trial pits, boreholes, DP, DCP, soakaway, etc. High-quality PDF logs and sections are quick and easy to print. Simple Excel logging templates are provided, and your company logo can be set and changed with ease.

There are desktop and web apps available, giving you complete control. Pebble Geo does not force you into a cloud-only platform, and it never will.

Its focus is simplicity and ease of use. There is no configuration required – it works right out of the box. Your engineers will be up and running in just a few minutes.

Your legacy projects load quickly and easily through the AGS import, allowing you to print logs from projects created using other systems. You can easily try it alongside your existing software too. AGS import is hassle-free, with no validation required on import, so you won't get stuck fixing files.

Why Pebble Geo?

Pebble Geo is built, distributed, and supported by a UK team. We're ex-BGS geologists and software developers, with decades of experience in building technical software.

We're the market leader in the UK for small to medium-sized companies, with well over 100 companies already on board, and hundreds of happy, active users.

<https://web.pebblegeo.com/customers.html>

You'll get hyper-responsive, same-day support. You'll get direct email and phone numbers for the product team.

<https://web.pebblegeo.com/contact.html>

You'll get regular updates at no cost, with real-world user feedback built into the capabilities at every step.

Free trials are available and we can add your whole team. Hassle-free demos are available, with no sales pressure.

Licensing is based on team size. Small team licenses (3 users) start from £395 + VAT p.a.
